SUMMARY

AI & Data Science engineer with hands-on experience in machine learning, deep learning, and LLM evaluation, having built and deployed production-grade systems at Kovai.Co using Azure, FastAPI, and React. Proven ability to deliver end-to-end solutions from a 96% accurate bone fracture detection model to a multimodal web authentication system and an AI-driven crop recommendation platform. Passionate about turning complex data into reliable, real-world applications.

WORK EXPERIENCE

Data Science Intern, Kovai.Co

Dec 2025 - Jun 2026

- Built a comprehensive evaluation framework to assess LLM performance across faithfulness, hallucination, jailbreak resistance, and other quality metrics.
- Redesigned and implemented the complete UI for an AI-powered product, including social media authentication and user analytics features.
- Gained hands-on experience with Azure services, including Function Apps, Web Apps, and Static Web Apps for cloud-native application development.
- Conducted contextual LLM testing and validation to identify model weaknesses and improve overall reliability and safety.
- Built a POC for an automated screenshot capture feature that processes article content, simulates the product workflow, and captures screenshots at specified intervals.

Innovation Engineer Trainee, Forge

Jan 2025 - Jul 2025

- Gained hands-on experience in AI, Machine Learning, IoT, and product development through industry-focused training programs.
- Applied design thinking methodologies to develop innovative solutions for real-world engineering and business challenges.
- Collaborated in multidisciplinary teams to rapidly prototype and deliver technology-driven solutions.

AI&ML Intern, EduSkills Foundation

Oct 2024 - Nov 2024

- Developed a bone fracture detection model achieving 96% accuracy using CNNs, TensorFlow, and scikit-learn. Built an end-to-end medical image analysis pipeline for automated fracture classification from X-ray scans.
 - Developed an AI-driven crop recommendation platform that predicts optimal crops using soil composition and climatic parameters.
-

SKILLS

Technical Skills

Python, SQL, MERN Stack, Git, Microsoft Azure, Data Analysis & Mining, Machine Learning, Deep Learning, Power BI, Excel, RapidMiner, HTML, CSS, JavaScript

Soft Skills

Leadership, Design Thinking, Problem-Solving, Decision-Making

Languages

English, Tamil

PROJECTS

Multi-Model based Web Authentication System

[Link](#)

- Engineered a multimodal authentication system leveraging computer vision and machine learning for automated age verification.
- Designed and integrated a real-time facial analysis pipeline using webcam input, React frontend, and FastAPI services.
- Created a secure content access workflow that uses AI-driven age prediction to enforce age-restricted platform policies.
- Built a modern, responsive video-streaming interface with seamless verification and session persistence capabilities.

Crop Recommendation Web Application

[Link](#)

- Engineered an AI-driven crop recommendation platform that predicts optimal crops using soil composition and climatic parameters.
- Trained and deployed machine learning models on agricultural datasets to deliver accurate, real-time crop suggestions.
- Designed an end-to-end predictive system combining data preprocessing, model inference, and user-friendly visualization.

Bone Fracture Detection

[Link](#)

- Engineered an AI-powered medical imaging solution for automated bone fracture detection using deep learning.
- Trained and optimized convolutional neural network models to classify fractures from X-ray images with high accuracy.
- Developed an end-to-end computer vision pipeline encompassing image preprocessing, model inference, and prediction visualization.

CERTIFICATIONS

- [IBM AI Engineering, Coursera](#)
- [Responsible and Safe AI system - NPTEL](#)
- [IBM Systems and Solutions Architect, Coursera](#)
- [Node.js Certification Course - Master the Fundamentals, Scaler](#)
- [React.js Certification Course - Master the Fundamentals, Scaler](#)

EDUCATION

Bachelor of Artificial Intelligence and Data Science

Jun 2022 - May 2026

Kumaraguru College of Technology - 8.28 CGPA

- Specialization in Artificial Intelligence and Data Science.

Diploma in Mechanical Engineering

Jun 2020 - May 2023

Sri Krishna Polytechnic College - 92%

- Specialised in Mechanical Engineering.

SSLC

May 2019 - May 2020

SRV Hr Sec School - 84%
